## Exceptional Service

"I've used DCL to convert book files to EPUB and MOBI for years now. They are wonderful to deal with, and the service is always quick and well-priced. I can't recommend them highly enough!"

# AMAZING! AMAZING!

"DCL is the absolute best at what they do! Working with Mary Jane Lopez was a pleasure. She/they wanted my project to be the best it can be and did everything to make that happen. **I had a complicated eBook conversion that other companies could not figure out and these guys did it with amazing results!** I can't say enough! The most important thing for me was not only having the project looking the best and pristine it can be, but also it was the customer service - it was the best you can ask for!! Between all the back and forth regarding the intricacies of the project, they worked with me with no stress whatsoever. A pleasure indeed and I cannot say enough. Many thanks to DCL and of course Jannie!"

# DEDICATION

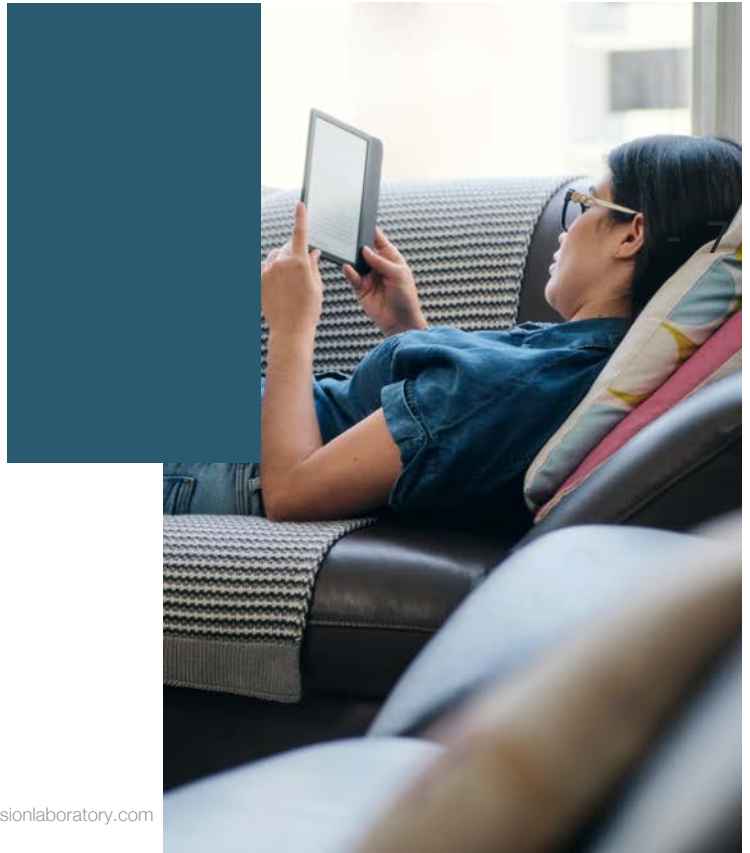

## I had a book published through a publisher in 1988

“After it went out of print and the publisher closed her business she recommended I self publish and put it out as an eBook. I have to tell you I am not a tech person at all. **I can’t remember how I discovered Data Conversion Laboratory but it must have been divine intervention!** Mary Jane Lopez took on the assignment and my book was republished with her guidance and it became a reality. In 2020, my second book is about to be published. It was so comforting to have Mary there to help me again. She is the most patient, helpful and caring person. I still am not at all techy and she walked me through everything. I definitely recommend Data Conversion Laboratory.”

# I LOVE THIS COMPANY

“Several years ago, I was beside myself as I searched for a way to convert my PDF book (containing tables, figures, figure lists, index and more) into a digital eBook. **With all my figures and maps requiring high resolution to read labels, etc. the prices were astronomical for this lone self publisher.** I called and voila, much lower prices and a great outcome. Recently, I returned with another smaller job, with the same happy outcome. But as in all publishing, there will be things to clean up. A week ago I emailed in some requests for minor fixes late one day, figuring I would hear back the next day or the day after. Well an hour later a revised file was back in my inbox!! I made three such requests and each response was like that until I was satisfied with no talk of more charges. I am so so impressed.”

# EXCEPTIONAL CUSTOMER CARE

“Mary Jane Lopez was at it again - giving the best and most supportive customer assistance possible. She helped me navigate a complex technical issue with my independent publisher, and stood with me until it was resolved. And, it was resolved, because Jannie had presented the correct information and guidance. **Grateful for her always-there, beyond the sale, customer support.**”

# MAGNIFICENT PRODUCT SUPPORT

"I had problems with the file DCL supplied, but they were not DCL's fault. The software of the distributor I was uploading to rejected the file. In the end, I tried one last time, and the software accepted the exact same file.

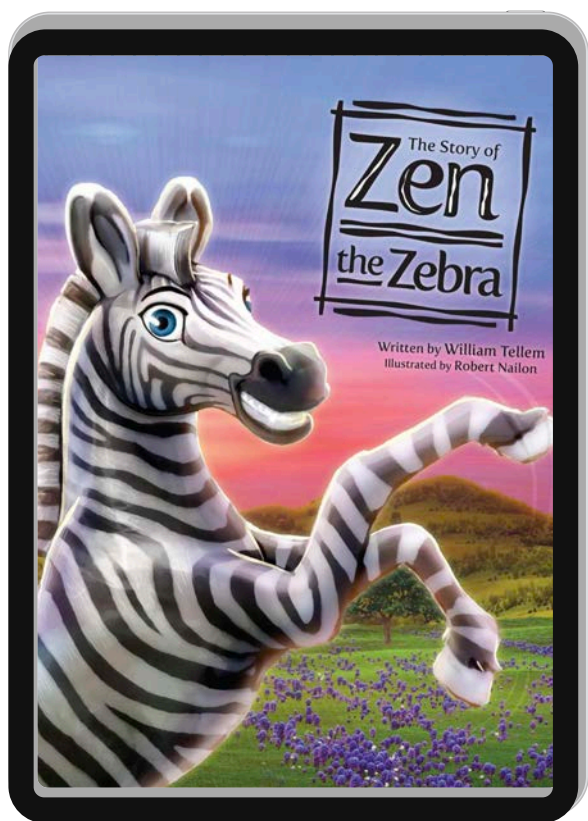

Given that experience, I learned a lot about DCL's product support. It was WONDERFUL! My questions were answered very quickly - usually within a couple of hours. DCL tested and retested the file to make sure it was up to standards. The experience was very enlightening.

I recommend DCL with no reservation. I am glad I had this experience."
