

CONTENT & DATA TRANSFORMATION & ENRICHMENT

Cyndie Gangi
Director of Regulatory
Advertising,
Labeling and Promotion
Biogen

“We’ve worked with DCL since 2007. I very much enjoy working with DCL; they are truly experts in their field, and we depend on them to find out for us what we don’t know. They always take any issue through to resolution which we really appreciate. They are dependable, have quick turnaround times and they always deliver. All of the people that I’ve worked with there have been incredibly professional, knowledgeable and very responsive.”

The data, information, and analytics economy runs on well-structured content and data.

STRUCTURING THE WORLD’S CONTENT & DATA

DCL solves content and data transformation challenges that enable the flow of information. Using the latest innovations in AI, including machine learning and natural language processing, DCL helps businesses organize and structure content and data for modern technologies and platforms.

With expertise across many industries including publishing, life sciences, government, manufacturing, technology and professional organizations, DCL uses its advanced technology and US-based project management teams to solve the most complex conversion challenges securely, accurately, and on time.
